Self-Managed
Provider Supplied
TRADITIONAL DATA CENTER

- On-premises infrastructure and applications
- Deployed by highly trained teams
- Tight control over security and compliance

CLOUD

- Cloud applications and infrastructure
- Deployed by multiple teams not under IT control
- High likelihood of inconsistencies and misconfigurations
Cloud environments are dynamic

Cloud Security Should...
Provide visibility and control to manage security in dynamic environments

The Cloud is Everywhere

Cloud Security Should...
Protect modern workloads in hybrid and multi-cloud environments

Agility of development and deployment of apps

Cloud Security Should...
Keep up with the agility and elasticity driven by DevOps and modern practices
CloudGuard IaaS + Dome9 = Comprehensive Multi-Cloud Security

- Full security visibility and control
- Cloud services and applications are never exposed
- Continuous compliance for cloud native services
- Auto-remediation of security misconfigurations
- Active protection against identity theft and data loss

- Market-leading threat prevention – anti-bots, IPS, anti-malware, AV and more
- Securely connect your hybrid cloud
- Adaptive policy for macro-segmentation
Check Point **CloudGuard Dome9**
SaaS Platform for Security and Compliance Automation in the Public Cloud

- **Network Security**
- **Continuous Compliance**
- **Privileged Identity Protection**
- **Cloud Threat Intelligence**

Protecting your Cloud workloads and services is no longer complex. Get full security visibility & control with continuous compliance.

**Native Support for the Big 3 Clouds**

- AWS
- Azure
- Google Cloud
Clarity: Complete Network & Security Visibility
Compliance Engine: Cloud Compliance and Best Practices
IAM Safety
Protect Against Compromised Credentials And Identity Theft

Advanced IAM protection for granular control over users, roles and actions, with just-in-time and out-of-band authorization

* Only Available for AWS
Magellan: Context-Aware Security Intelligence

Magellan

Cloud-native security intelligence technology that delivers cloud intrusion detection, network traffic visualization and user activity analytics.
Magellan: Context-Aware Security Intelligence

- Visual Traffic Map
- Detailed Properties
- Enriched FlowLogs
- Canned & Custom Queries
